GOING GREEN IN ST. PAUL'S

Building a Bug Hotel!

In June 2014, Mr. O'Hare's class went about researching and designing an environment which would encourage a some wild life to come and make their home in St. Paul's.

The construction product took place shortly after and we were delighted when Mr. Kennedy from Ballymoyer PS came in a officially opened the "Bug Hotel".

St. Paul's Needs your bottle!

Our main project for 2015 is to create a greenhouse for St. Paul's. To do this we need approximately 1500 two litre plastic bottles. We are very fussy about the type of bottle as they need to be stacked to for the walls. So no curvy coke or Fanta bottle please. All bottles should be left them with Miss McNamee or Mr. Murphy in January.

Our Objective:

Working with others to promote biodiversity in our school and local community.

Follow our activities on twitter:
